LEADERSHIP IMPACT

- Ready to Empower (RTE), a US based organization was incorporated and a Board was established.
- The founder of RTE, Amanda Ready, created support programs for women in need in Costa Rica. These included mental health therapy, fitness and wellness classes, education classes, job training, and emergency support.
- Two local Costa Rican women were hired to carry out the support programs while RTE raised funds in the US.
- Seed money was acquired through online campaigns and personal contributions from Ready.
